In Ben Guerir, Morocco JMPV France presented its latest solutions for the fertilizer industry.

Starting on October 7th, JOEST Manutention Par Vibration exhibited at the Congress Center of the Mohammed VI Polytechnic University, for three days. Professionals from all over the world came to the trade show to exchange current news in the fertilizer industry.

JOEST drew the visitor's attention to large Screens for various applications. It became obvious to the visitors, that there are no limits concerning the size of JOEST machines. Their excitement about the innovative JOEST solutions was a frequent conversation starter. The booth had many visitors and JMPV is looking forward to the subsequent conversations in the upcoming weeks. JOEST thanks all visitors for making the show a full success.
