

With strong support from the in-house brand DIETERLE®, JOEST is once again present at POWTECH this year!

Categories: JOEST, Chemical, Food & Thermal Processing

Published March 27, 2019

To kick off the trade fair year 2019, JÖST GmbH + Co. KG will once again exhibit at the most important trade fair for powder and bulk, granulate, chemical and thermal processing technologies. From April 09 to 11, 2019 JOEST, one of the leading suppliers in the field of manufacturing of vibration technology, will presents its machine and process technology solutions in Nuremberg including its in-house brand DIETERLE®. DIETERLE® is an expert in the field of lifting and tilting technology, as well as conveying and storage technology in intralogistics. Both brands will present a strong selection of their latest and most successful products at POWTECH.

For over **100 years** JOEST has been configuring customized solutions, which are constantly undergoing further development. JOEST can find a solution for almost every application and every bulk material. Our machines combine particularly well with the lifting, tipping and conveying technology of DIETERLE®, thus creating complete solutions for our customers. Experience, competence and modern technologies create the basis for the proven JOEST quality.

In order to experience our spiral conveyors, dryers, screens and feeders in action, you can convince yourself of our products in **Hall 1, Booth 1-145**. At our booth, you can configure our JOEST dosing feeder, which are mainly used in the chemical and food industry, independently on a stand with touch display according to your application.

Whether **drying, cooling, screening, sifting, dosing, conveying, lifting, tipping or thermal processing** - JOEST's product portfolio satisfies all customer requirements.

Visit us at our booth to discuss with us innovative solutions for your applications with us. We look forward to hearing from you!
