Fluidized bed dryer for Polish end customer

JOEST received another order for a fluidized bed dryer for the thermal processing of mineral granulates.

The scope of supply includes the complete control and process air technology, as well as the piping, a heating-gas generator and a highly efficient exhaust recirculation. The fluidized bed dryer with a total weight of 19 tons has a dimension of 2.500 x 8.800 mm.

The delivery to the Polish end customer is scheduled for late 2015.

JÖST GmbH + Co. KG is a medium-sized, owner-managed company and an international leader in the field of vibration technology. Our core competences are the design and manufacture of vibratingscreens, vibrating drives as well as setting up complete process engineering solutions for processing bulk materials.
