

Tilting Skip Weighing Scale Type: HMW

HERWEG® Tilting Skip Weighing Scales are selected when a gravimetric exact feeding of different processing machines is requested, e.g. scrap balers.

Areas of application:

- Automobile industry
- Recycling-plants: for plate boxes
for broken waste glas

Your benefit:

- + High operational safety
- + High weighing accuracy
- + Rigid and industry-suitable construction
- + High-capacity design of the load cells and built-in parts
- + High endurance
- + The evaluation device can be combined with all programmable

Technical data:

- Volume: 1,0 – 10 m³
- Weighing area: 50 – 5.000 kg
- Product: plate cut, packets
- Special characteristics: slewable and tiltable

Reference plants:

Metso - Swedala Lindemann / Düsseldorf
Henschel Recycling Technik- Kassel
Volkswagen – Kassel
Daimler Chrysler – Bremen
Renault – Frankreich
Karmann – Osnabrück
Nacanco – Gelsenkirchen
